## Year 9 Overview:

Year 9 is the start of the GCSE course and students build upon the core skills learnt in Years 7 and 8 and extend their knowledge with new topics such as Pythagoras and Data Handling. Reasoning skills are developed to ensure understanding.

| Autumn Term |  |  |
| :---: | :---: | :---: |
| Outline of Key Learning | Hegarty Code | Lesson |
| Indices, powers and roots (1c) <br> a. Evaluate expressions involving squares, cubes and roots <br> b. Add, subtract, multiply and divide numbers in index form <br> c. Cancel to simplify a calculation <br> d. Use index notation for powers of 10 , including negative powers | $\begin{gathered} 151,152,153 \\ 173 \\ 174 \\ 173,174 \end{gathered}$ | Types of numbers <br> Rules of Indices |
| Factors, Multiples and Primes (1d) <br> a. Find the prime factor decomposition of positive integers and write as a product using index notation <br> b. Find common factors and common multiples of two numbers <br> c. Find the LCM and HCF of two numbers, by listing, Venn diagrams and using prime factors: include finding LCM and HCF given the prime factorisation of two numbers <br> d. Solve simple problems using HCF, LCM and prime numbers | 29,30 $\begin{gathered} 31,32 \\ 35,167 \end{gathered}$ <br> LCM:34,35,36 HCF: 31,32,167 | Factors, multiples and primes <br> HCF and LCM |
| Pythagoras (12) <br> a. Understand, recall and use Pythagoras' Theorem in 2D, including leaving answers in surd form <br> b. Apply Pythagoras' Theorem with a triangle drawn on a coordinate grid | 498-504 | Pythagoras Theorem 1 |

## Mathematics Department

| Expanding and Factorising expressions (2a, 2b) |  |  |
| :--- | :--- | :---: |
| a. Manipulate and simplify algebraic expressions by collecting 'like' terms | Simplify Expressions |  |
| b. Use index notation when multiplying or dividing algebraic terms |  |  |
| c. Write and simplify expressions using squares and cubes; |  |  |
| d. Simplify expressions involving brackets, i.e. expand the brackets, then add/subtract |  |  |
| e. Recognise factors of algebraic terms involving single brackets |  |  |
| f. Factorise algebraic expressions by taking out common factors | 157 | Multiplying Terms |
| Expressions and substituting into formulae (2c) | 170,171 | Expand and simplify |
| a. Substitute numbers into expressions involving brackets and powers <br> b. Substitute positive and negative numbers into expressions <br> c. Derive a simple formula, including those with squares, cubes and roots <br> d. Substitute numbers into a formula | bactorising (single |  |

| Spring Term |  |  |
| :--- | :---: | :---: |
| Outline of Key Learning | Hegarty Code | Lesson |
| Representing Data (3a, 3b) <br> a. Sort, classify and tabulate data for grouped, discrete and continuous data, use <br> inequalities for grouped data, and introduce $\leq$ and $\geq$ signs | 392,393 |  |
| b. Construct tables for time-series data <br> c. Work out time taken for a journey from a timetable <br> d. Design and use two-way tables for discrete and grouped data <br> e. Draw and interpret; pictograms, dual bar graphs, line graphs, histograms with equal <br> class widths and stem and leaf | $450-452$ | Time Series and 2-Way |
| Tables |  |  |

Mathematics Department

| Fractions (4a) |  |  |
| :---: | :---: | :---: |
| a. Compare fractions, use inequality signs, compare unit fractions <br> b. Convert between mixed numbers and improper fractions <br> c. Add and subtract fractions and write the answer as a mixed number <br> d. Multiply and divide an integer by a fraction |  | +/- Fractions <br> +/-Mixed Numbers <br> $\mathrm{x} / \div$ Fractions |
| Fractions, Decimals and Percentages (4b) <br> a. Compare and order fractions, decimals and integers, using inequality signs <br> b. Express a given number as a percentage of another number <br> c. Convert between fractions, decimals and percentages <br> d. Order fractions, decimals and percentages | $\begin{gathered} 46 \\ 52,55 \\ 82,83 \end{gathered}$ | FDP Equivalents |
| Percentages (4c) <br> a. Calculate amount of increase/decrease <br> b. Use percentages to solve problems, including comparisons of two quantities using percentages <br> c. Use percentages in real-life situations, including percentages greater than $100 \%$ <br> d. Use a multiplier to increase or decrease by a percentage in any scenario where percentages are used | $\begin{gathered} 88-90 \\ 97,98 \end{gathered}$ | $\begin{gathered} \text { Percentages } \\ \text { Percentage } \\ \text { Increase/Decrease } \end{gathered}$ |
| Pie Charts \& Scatter graphs (3c, 3d) <br> a. Construct pie charts for categorical data and discrete/continuous numerical data <br> b. Interpret simple pie charts using simple fractions and percentages <br> c. Understand that the frequency represented by corresponding sectors in two pie charts is dependent upon the total populations represented by each of the pie charts <br> d. Draw and Interpret scatter graphs <br> e. Draw the line of best fit on a scatter diagram by eye, and understand what it represents <br> f. Use the line of best fit make predictions; interpolate and extrapolate apparent trends whilst knowing the dangers of so doing | $\begin{gathered} 424-426 \\ 427-429 \\ 453,454 \end{gathered}$ | Pie Charts <br> Scatter Graphs and Correlation |

Ifield Community College
Mathematics Department

| Summer Term |  |  |
| :---: | :---: | :---: |
| Outline of Key Learning | Hegarty Code | Lesson |
| Equations and Inequalities (5a, 5b) <br> a. Solve linear equations, with integer coefficients, in which the unknown appears on either side or on both sides of the equation <br> b. Solve linear equations which contain brackets, including those that have negative signs occurring anywhere in the equation, and those with a negative solution <br> c. Rearrange simple equations <br> d. Substitute into a formula, and solve the resulting equation <br> e. Show inequalities on number lines and write down whole number values that satisfy an inequality <br> f. Solve an inequality such as $-3<2 x+1<7$ and show the solution set on a number line <br> g. Use inequality notation to specify simple error intervals due to truncation or rounding | $\begin{gathered} 186 \\ \\ 287 \\ 265-6 \\ 268 \end{gathered}$ | solving linear equations equations with brackets rearrange equations inequalities on a number line solving inequalities |
| Sequences (5c) <br> a. Find the nth term for a pattern, linear and arithmetic sequence <br> b. Use the nth term of an arithmetic sequence to decide if a given number is a term in the sequence, or find the first term over a certain number <br> c. Continue a geometric progression and find the term-to-term rule, including negatives, fraction and decimal terms; <br> d. Continue a quadratic sequence and use the nth term to generate terms | 198 247 | finding nth term <br> nth term in descending patterns continuing quadratic sequences |
| Properties of Shapes, angles in polygons (6a. 6b) <br> a. Classify quadrilaterals and triangles by their geometric properties <br> b. Use geometrical language appropriately and give reasons for angle calculations <br> c. Calculate and use the sums of the interior angles of $n$-sided polygons <br> d. Explain why some polygons fit together and others do not | $\begin{aligned} & 823-6 \\ & 561-2 \\ & 812-4 \end{aligned}$ | quadrilaterals/triangles <br> finding missing angles interior angles fitting shapes together |
