

Ardingly Solar Project 09.03.19

Preparation ramped up this week as we head towards the Albi Eco Race (albiecorace.com) and Albert II, Prince of Monaco's visit on 4th April. We have been continuing our molding of the doors so they can be attached to the car to make it workable.

The main job has been getting the layers of carbon fiber ready and working as a team to ensure we get the best fit possible.

New developments

The big news of the week is the fact the Year 9 part of the team are off to Albi in southern France on Thursday 23rd May!! This will give us the perfect opportunity to test the car, give some of the drivers' time behind the wheel before BWSC in October. The trip will be another collaborative venture with Ardingly as we are planning on camping down there and manning the pits through the night for the 24-hour race.

We have also entered the TES Awards (www.tesawards.co.uk/tessa2019/en/page/home) for the STEM Team of the Year.

Upcoming Events

- 2nd April** STEMfest launch where we will have a little display.
- 4th April** Prince Albert II of Monaco visits
- 11th May** EVER Conference in Monaco (more details on that one to come)
